1 · Before you watch | 2 · Transcript | 3 · Comprehension (15) | 4 · Script gap-fill | 5 · Vocabulary (10) | 6 · Your opinion | 7 · Summary

Predict. Read the title. What do you think the speaker will claim? Read the title. What do you think actually makes muscles grow — training, food, rest, or something else? Read the title. Who was Cassandra, and what do you think "tragedy" means here? Write 2–3 sentences.

I think the speaker will say that...

Key words to listen for: posture | hormone | confidence | fake it | power pose | motor neurons | tension | damage & repair | hypertrophy | atrophy | protein | rest | prophecy | curse | Apollo | besieged | in vain | doom

CODE-DERIVED RECONSTRUCTION

Source: owner-supplied archive / app.rtf, extracted HTML + CSS; scripts/network disabled.

▶ 00:07 Troy's princess, Cassandra, wasn't cruel to her soon-to-be sister-in-law, the legendary beauty Helen, out of **spite** . It was because she was suffering under the weight of a tortuously twisted **curse** , which **haunted** her with **appalling** visions linked to Helen's arrival.

▶ 00:25 Helen was already married to the Spartan king Menelaus, after all. And when Cassandra's brother, Prince Paris, prepared to sail to Sparta, she **foresaw** his **calamitous** attachment to Helen and begged him to stay. But he'd merely **dismissed** her, fallen for Helen, and returned to Troy with her in tow. **Beset** by violent **premonitions** , Cassandra then warned that Menelaus' **vengeful** crusade would lead to the brutal fall of their family and the city of Troy. But once again, people ignored her.

▶ 01:00 In fact, they always did. And this was the **crux** of her curse. As a young woman she had been pursued by the god Apollo. He offered her the gift of **prophecy** . But when she **withdrew** from his advances, he twisted his gift into a maddening **hex** : from that day on, Cassandra would be able to precisely see and describe the future— but her prophecies would never be believed. Despite this, Cassandra **resolved** to always speak the truth, even as her family fell deeper into **denial** .

▶ 01:36 Her **dire** warnings became increasingly **repellent** to her father, Trojan King Priam. And when the war began, as she'd predicted, he declared that her **meddling** was bad for **morale** and **confined** her to a high tower. From this **unobstructed** lookout, Cassandra watched everything unfold. Over 10 agonizing years, she witnessed her

Full script with timestamps. Tap ▶ to jump the video to that line. Tap any **golden word** for meaning + Uzbek. Tip: turn on 🎵 **Script follow** (right panel) and the script will follow the video like song lyrics.

▶ 0:06 Muscles. We have over 600 of them. They make up between 1/3 and 1/2 of our body weight, and along with connective tissue, they **bind** us together, hold us up, and help us move. And whether or not body building is your hobby, muscles need your constant attention because the way you treat them on a daily basis determines whether they will **wither** or grow.

▶ 0:31 Say you're standing in front of a door, ready to pull it open. Your brain and muscles are perfectly **poised** to help you achieve this goal. First, your brain sends a signal to **motor neurons** inside your arm. When they receive this message, they fire, causing muscles to **contract** and relax, which pull on the bones in your arm and generate the needed movement.

▶ 0:53 The bigger the challenge becomes, the bigger the brain's signal grows, and the more motor units it **rallies** to help you achieve your task. But what if the door is made of solid iron? At this point, your arm muscles alone won't be able to generate enough **tension** to pull it open, so your brain appeals to other muscles for help.

▶ 1:13 You plant your feet, tighten your belly, and tense your back, generating enough force to **yank** it open. Your nervous system has just **leveraged** the resources you already have, other muscles, to meet the demand.

▶ 1:27 While all this is happening, your muscle **fibers** undergo another kind of cellular change. As you expose them to stress, they experience microscopic damage, which, in this context, is a good thing. In response, the injured cells

6 · Your opinion 7 · Summary

Part A · Multiple choice

1 Why was Cassandra unkind to Helen?

- ○ A out of jealousy of Helen's beauty
- ○ B because her visions linked Helen to disaster
- ○ C because Helen had insulted Paris

2 What did Apollo do when Cassandra rejected him?

- ○ A took away her gift of prophecy
- ○ B made her prophecies impossible to believe
- ○ C locked her in a tower

3 Why did King Priam confine Cassandra to a tower?

- ○ A to protect her from the Greeks
- ○ B because her warnings were bad for morale
- ○ C because she attacked the wooden horse

4 How did the Trojans react when she ran at the horse?

- ○ A they burned the horse
- ○ B they wrestled her down and mocked her
- ○ C they sent her back to the tower

Part B · True / False / Not Given

Check answers

Answer key + timestamps appear after checking

Part A · Multiple choice

1 What happens FIRST when you want to pull a door open?

- ◯ A your muscles contract immediately
- ◯ B your brain sends a signal to motor neurons
- ◯ C your back muscles tense

2 When the task gets harder, what does the brain do?

- ◯ A sends a bigger signal and rallies more motor units
- ◯ B tells the muscles to relax
- ◯ C sends the same signal again

3 Microscopic damage to muscle fibers is...

- ◯ A always dangerous
- ◯ B in this context, a good thing
- ◯ C a sign of illness

4 What are cytokines?

- ◯ A hormones that build muscle directly
- ◯ B inflammatory molecules that call the immune system to repair the injury
- ◯ C proteins found in food

Part B · True / False / Not Given

Ted - Comprehension

CODE-DERIVED RECONSTRUCTION

Source: owner-supplied archive / app.rtf, extracted HTML + CSS; scripts/network disabled.

5 Everyday activities usually produce enough stress to grow new muscle.

○ TRUE ○ FALSE ○ NOT GIVEN

6 Muscles that get no resistance will shrink.

○ TRUE ○ FALSE ○ NOT GIVEN

7 The video says vegetables are the best source of protein.

○ TRUE ○ FALSE ○ NOT GIVEN

8 Muscle repair happens mainly during rest, especially at night.

○ TRUE ○ FALSE ○ NOT GIVEN

Part C · Complete the sentences · ONE WORD from the video

9 Building new muscle is a process called 9 .

10 Muscle loss from no use is known as muscular 10 .

11 Protein provides building blocks in the form of amino 11 .

12 Meaningful growth requires challenge and 12 .

Part D · Short answers

13 In your own words: why is muscle damage "a good thing" here?

Because the body…

14 Besides exercise, name three things muscles need to grow.

They also need...

15 What is an eccentric contraction?

Tension while…

1 · Before you watch | 2 · Transcript | 3 · Comprehension (15) | 4 · Script gap-fill | 5 · Vocabulary (10) | 6 · Your opinion | 7 · Summary

Speaking-style question. Do you agree that changing your body can change your mind? Give one example from your own life. The talk ends: meaningful growth requires challenge and stress — in muscles and in life. Do you agree this is true outside the gym (for example, in learning English)? Give one example from your own experience. Have you ever warned someone about something and not been believed? What happened, and how did it feel? (60–100 words, or record 1 minute)

In my opinion...
