Step 1 - Real Exam

Passage 13 - Antarctic Research

17:42 Highlight

Part 2 - Read the text

A Antarctica is the coldest, windiest and driest continent, yet it hosts intense scientific research. More than thirty nations operate stations there under a treaty signed in 1959.

B Ice cores preserve air bubbles trapped up to 800,000 years ago. Each layer records a year, much like rings of a tree.

C Work on the ice is expensive and logistically demanding. Critics argue money could go to satellite observation.

D Supporters reply satellites measure the surface, not the history beneath it. The two approaches are complementary.

Questions 14-26

Questions 14-17 - Notes completion

Treaty signed in [14]

Air bubbles up to [15] years old

Each layer records a [16]

Satellite observation covers continent [17]

Questions 18-20 - T/F/NG

18. Statement from the passage — T F NG

19. Statement from the passage — T F NG

20. Statement from the passage — T F NG

When People Are 'Deaf' to Music

Reading Challenge article - ~910 words - 25 target words

> 1:05 / 6:40 0.8x 0.9x 1x 1.1x 1.25x

The current paragraph glows while it is read. Tappable target words open meaning, Uzbek translation and example.

Most people can tell when a song is out of tune, even if they have never had a music lesson.

But for a small number of people, music is simply noise: a jumble of sounds with no pattern, no melody and no emotional pull.

Scientists call the condition congenital amusia

Estimates suggest around four per cent of the population is affected. Those with amusia can hear perfectly well, and most have normal speech and language.

What they lack is the ability to perceive pitch - the highness or lowness of a note - and to hold a tune in memory.

perceive hereditary

perceive

farqlamoq - notice / see the difference

Example: "What they lack is the ability to perceive pitch."

Hear it

Mission 2 - IELTS Reading

When People Are 'Deaf' to Music - the real test

20:00 Highlight

Passage - IELTS version

Most people can tell when a song is out of tune, even if they have never had a music lesson. For a small number of people, music is simply noise: a jumble of sounds with no pattern, no melody and no emotional pull.

Estimates suggest around four per cent of the population is affected. Those with amusia can hear perfectly well, and most have normal speech and language.

The condition is usually hereditary. In family studies, first-degree relatives shared the condition more often than controls.

Questions 1-13

Questions 1-5 - TRUE / FALSE / NOT GIVEN

1. Most people need lessons to notice a wrong note. T F NG

2. People with amusia usually have hearing problems. T F NG

Questions 6-9 - ONE WORD ONLY

Amusia affects about [6] per cent.

Sufferers cannot perceive [7].

Check answers

After Check - instant feedback

Q1 FALSE: 'even if they have never had a music lesson' - lessons are not needed.

...hear perfectly well', so it is given and FALSE.

Essential Videos (20) Academic Lab (30) General Reading (30) Question types (14) Retention

<- All question types Question type

True / False / Not Given

Learn Drill

The rule

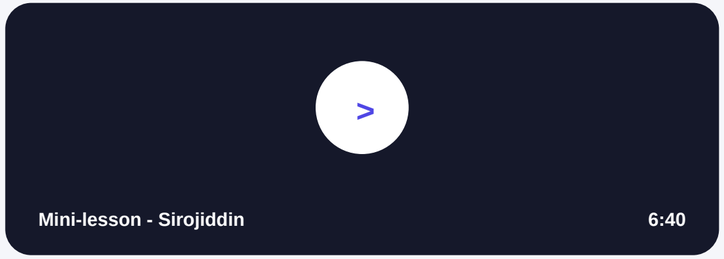

TRUE — Statement agrees with the information - usually paraphrased, never copied.

FALSE — Passage says the opposite or contradicts a detail.

NOT GIVEN — Passage does not state the exact claim.

The examiner's trick

Keywords appear in the passage, so a statement feels true. Find the sentence and compare every claim word - one changed word can flip the answer.

3-step method

1 **Underline the claim words**
who - how many - when - how much

2 **Find the sentence**
scan for names, numbers, synonyms

Start drill 1 **y part**
contradiction = F, missing = NG

How Cities Remember

Cities remember their past in ways that are both obvious and hidden. Monuments and museums make memory visible, but street names, transport routes and even the shape of a public square may preserve decisions made decades earlier.

Researchers who study urban memory argue that people do not simply inherit these reminders. They reinterpret them. A statue that once symbolised national pride may later become a focus of protest, while an abandoned factory can be transformed into housing or an arts centre.

This constant reinterpretation means that the same place can carry several histories at once. For residents, learning to notice these layers can change how familiar streets are understood.

Read in chunks. Do not re-read lines.

RETENTION - RECALL

Write what you kept

2:03

Check what I kept

Write everything you remember. Order and spelling do not matter. Numbers and names earn points. Write in English.

Cities keep history through monuments, museums and also less obvious things like street names and transport routes. People reinterpret these memories. A statue can become a protest focus, and old factories may become homes or arts centres. The same place can hold several histories at the same time.

B2 - How Cities Remember

80 / 100

Strong recall

76%	238	+4	80
kept	words/min	speed bonus	your best

What you kept

- \+ Cities preserve memory beyond monuments
- \+ Street names and routes can hold past decisions
- \+ A statue can later become a protest focus
- \+ Places can carry several histories

What you missed

- \- Researchers call this 'urban memory'
- \- Factory example included housing OR arts centre
- \- Residents can reinterpret familiar streets
